Applied Marketing is a concise product that provides the very latest examples of marketing techniques and campaigns from today's business world without compromising on traditional theories of marketing. Marketing is about decision making and professors want material that will help students

develop their critical thinking skills so they can think like a marketer and see that marketing is everywhere around them. Who better to develop such a product than a practitioner, Andrew Loos of Attack Marketing, and an academic, Daniel Padgett of Auburn University. Together these authors provide insights into what employers need, know the latest tools used by companies today and can help students smoothly move from the classroom to their careers. Applied Marketing connects traditional marketing with customer-perspective marketing, thus teaching students the value of allowing customers to feel more connected to the product, brand and company.

**ISE Fundamentals of Advanced Accounting** McGraw-Hill/Irwin

Presents the research and cases that focus on the professional responsibilities of accountants and how they deal with the ethical issues they face.

This title features articles on a broad range of important topics, including professionalism, social responsibility, ethical judgment, and accountability.

Accounting 9th edition continues the strong reputation established by this leading Australian text as the most comprehensive book for students studying introductory accounting in undergraduate or postgraduate programs. The full-colour design and improved pedagogy provides students with a reader-friendly text to enhance their understanding of concepts and make their study more enjoyable. The text builds on the thorough and reliable explanation of the accounting process through the Business Knowledge chapter vignettes that apply the principles to practice. Previous editions were renowned for the number of exercises and problems, and the new edition builds on this superior teaching feature. The end-of-chapter activities are

designed to encourage student confidence through the development of skills in decision making, critical thinking, ethical thinking, analysis and communication.

*Shot All to Hell* by Mark Lee Gardner recounts the thrilling life of Jesse James, Frank James, the Younger brothers, and the most famous bank robbery of all time. Follow the Wild West's most celebrated gang of outlaws as they step inside Northfield's First National Bank and back out on the streets to square off with heroic citizens who risked their lives to defend justice in Minnesota. With compelling details that chronicle the two-week chase that followed—the near misses, the fateful mistakes, and the bloody final shootout on the Watonwan River, *Shot All to Hell* is a galloping true tale of frontier justice from the author of *To Hell on a Fast Horse: The Untold Story of Billy the Kid and Pat Garrett*, Mark Lee Gardner.

*Governmental and Nonprofit Accounting, Revised Sixth Edition* provides a better balance between theory and practice than other texts, with the most up-to-date coverage. It provides readers with a thorough basis for understanding the logic for and nature of all of the funds and account groups of a government, with a unique approach that enables readers to grasp the entire accounting and reporting framework for a government before focusing on specific individual fund types and account groups. Includes coverage of the new reporting model standard: GASB Statement 34. Includes illustrations of government-wide financial statements and fund-based financial statements presented using the major fund approach. Points out the major changes required from the current guidance and explains and illustrates the requirements of the new model. Explains and illustrates the GASB Statement 31. Contains the latest revision of OMB Circular A-133 on single audits. Appropriate for undergraduate Accounting courses, such as Governmental Accounting, Public Sector accounting, Government and Nonprofit Accounting, and Fund Accounting.

The approach used by Hoyle, Schaefer, and Doupnik in the new edition allows students to think critically about accounting, just as they will do while preparing for the CPA exam and in their future careers. With this text, students gain a well-balanced appreciation of the Accounting profession. As Hoyle 11e introduces them to the field's many aspects, it often focuses on past controversies and present resolutions. The text continues to show the development of financial reporting as a product of intense and considered debate that continues today and into the future. The writing style of the ten previous editions has been highly praised. Students easily comprehend chapter concepts because of the conversational tone used throughout the book. The authors have made every effort to ensure that the writing style remains engaging, lively, and consistent which has made this text the market leading text in the Advanced Accounting market. The 11th edition includes an increase integration of IFRS as well as the updated accounting standards.

*Fundamentals of Advanced Accounting* McGraw-Hill Europe

Accounting is the discipline with the oldest historical culture, being the first to be recognized by humanity when Adam and Eve were made to account for what they did in paradise. It is also the only discipline that will come into play in the Hereafter, where everybody would be raised up as an accountant - to account for all they have done during their life time on earth! Accounting is a service-providing discipline, with a rich theoretical background, which makes available information (especially financial) to guide various decision-making processes. Business owners, creditors, managers, prospective investors, government and its agencies, employees and even the general public seek accounting information to guide them when taking various informed decisions about reporting entities and the environment within which they operate. This book addresses the historical accounting culture, its theories as well as its practices. It is made up of fifteen chapters, covering various historical, theoretical and practical aspects of Accounting, ranging from accounting standardization to financial reporting. The book is an attempt to address some of the lacunae in advanced accounting issues, both in theory and in practice. Students of advanced accounting theory and practice at the professional and academic levels in Universities, Polytechnics and Professional Institutes would find the book an essential companion.

"This text offers a current, condensed treatment of advanced accounting topics and a unique emphasis on accounting research. Taking a macro approach and then relating it back to an application, the text attempts to explain the "why" behind accounting, in addition to the procedural methods. The authors are active teachers and have been successfully using this material in the classroom for many years. Each copy of the textbook is accompanied by a current FARS (Financial Accounting Research System) CD-ROM."
