Ever been forced to build your own car? THE SEVEN, the legendary Lotus sports car that first appeared in 1957 is still in production, as a kit. If you want one you must build it. The author sets out to build a Caterham Seven without first acquiring the needed skills. The fingertip ease of the digital age is replaced by unheated garages, fumes and typed instructions obscured by oily fingerprints. Between chapters a running history, illustrated with cartoons, tells the Seven's 50 year story using quotes from the many articles, test drives and books on the car. For anyone who has ever wanted to build something with

their own hands - despite skill, aptitude and experience. Why build A Seven? Putting a sportscar on the road. The Borowitz Report Penguin  
Step-by-step guide to building a dream sportscar on a budget. Based on available Ford Sierra mechanical components: use a straight 4 or V8 engine, including Pinto, Zetec or Rover K-Series. All parts available from Tiger Sportscars.

This book invites kids to expand their imaginations more than ever before, with eight unique themes ranging from popular vehicles and practical projects, to imaginative fairytale fun and a thrilling spy mission. This time around, Sarah includes chapters for mini projects and LEGO art, both of which have been popular categories on her blog but never explored in her previous books. Younger kids can follow along with the simple step-by-step instructions that have made Dees's books the success they are today—they'll delight in making tiny zoos with unique animals, a classic diner complete with a soda fountain and a school classroom they can customize to look like their own. Older children will love building such action-packed pieces as a rescue mission helicopter, an air hockey table, and a surveillance car with rear-hinged getaway doors. For LEGO lovers of any age, there are instructions for making your own around-the-house gadgets, such as desk organizers, picture frames, and even lock-and-key safes. The Big Book of Amazing Lego Creations will be a top gift pick for every kid who craves variety in their LEGO crafting. If your kids would be excited to build epic kingdoms one day and sprawling super-spy headquarters the next, this is the book for you.

A great book to share. Read the charming story, then press out the model boards and build your own sports car, jeep, and road. Children will enjoy the story of the two cars that set out on an incredible journey. What interesting things will they see on the way? Extra questions challenge children to study the pictures in the book. The road is simple to press out and put together, and making a real sports car and jeep will give children a real sense of achievement. The models are sturdy enough to withstand hours of play.
