With new technologies constantly being created, implemented, and sold, it is a robust opportunity for companies to hop on board with the latest digital trends. With the business world undergoing rapid changes and advancements in current times, the transformation process has been rapid and the disruptions significant. This has created a culture of innovation and a plethora of available business opportunities, especially when focused on Central Asia, Southeast Asia, and East Asia. Along with these innovative technologies and new opportunities in the business world comes challenges and trends within the Asian region that require more attention and advanced research to fully understand this digital transformation era and the resulting impacts, challenges, and solutions. The Handbook of Research on Disruptive Innovation and Digital Transformation in Asia addresses key topics for understanding business opportunities in Asia, covering a variety of challenges and nations in the Asian region from technological disruption and innovation to connectivity and economic corridors in Asia, Islamic finance and tourism, and more. Due to its innovative topics and approaches, geographical focus, and methodologies, the chapters provide readers with a unique value in bringing new perspectives to understanding emerging businesses and challenges in Asia. This book is ideal for professors in academia, deans, students, politicians, policymakers, corporate heads of firms, senior general managers, managing directors, information technology directors and managers, and researchers.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by

a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at [www.worldbank.org/globalfindex](http://www.worldbank.org/globalfindex).

The book discusses the effects of artificial intelligence in terms of economics and finance. In particular, the book focuses on the effects of the change in the structure of financial markets, institutions and central banks, along with digitalization analyzed based on fintech ecosystems. In addition to finance sectors, other sectors, such as health, logistics, and industry 4.0, all of which are undergoing an artificial intelligence induced rapid transformation, are addressed in this book. Readers will receive an understanding of an integrated approach towards the use of artificial intelligence across various industries and disciplines with a vision to address the strategic issues and priorities in the dynamic business environment in order to facilitate decision-making processes. Economists, board members of central banks, bankers, financial analysts, regulatory authorities, accounting and finance professionals, chief executive officers, chief audit officers and chief financial officers, chief financial officers, as well as business and management academic researchers, will benefit from reading

this book.

The coronavirus disease (COVID-19) pandemic is accelerating digital transformation across Asia and the Pacific. Digital platforms have become prominent intermediaries or marketplaces that allow the exchange of goods, services, and information. They are opening new transaction channels and ways of using resources while lowering service costs and enhancing market efficiency. This volume of background papers, prepared for the Asian Economic Integration Report 2021, examines the scope and potential benefits of digital platforms, as well as the associated policy issues and challenges. It proposes measures and policies to help maximize social and economic gains while alleviating adverse effects.

The finance industry is currently going through a digital revolution, with new and developing technology transforming the world of banking and financial services beyond recognition. Banks and financial institutions worldwide recognize the pressing need to innovate to avoid disruption or displacement by highly agile and often smaller fintech companies. Reinventing Banking and Finance is an essential guide for finance professionals to current trends in fintech, innovation frameworks, the challenges of outsourcing or embedding innovation, and how to effectively collaborate with other organizations. Beginning with the history and background of how banking got to the era of fintech, the book provides a thorough overview of the global fintech ecosystem and the drivers behind innovation in technologies, business models and distribution channels. Examples of key institutions and interviews with innovators and experts shine a light on key financial innovation hubs in UK, US, China, Israel and more, and offer advice for institutions looking to choose the right market for their needs. Covering genuine innovations in AI, machine learning, blockchain and digital identity, Reinventing Banking and Finance offers expert insight into navigating the complex and multi-layered finance industry.

A major source of financing for the poor and no longer a niche industry. Over the past four decades, microfinance—the provision of loans, savings, and insurance to small businesses and entrepreneurs shut out of traditional capital markets—has grown from a niche service in Bangladesh and a few other countries to a significant global source of financing. Some 200 million people globally now receive support from microfinance institutions, with most of the recipients in the developing world. In the beginning, much of the microfinance industry was managed by non-governmental organizations, but today the majority of these institutions are commercial and regulated by governments, and they provide safe places for the poor to save, as well as offering much-needed capital and other financial services. Now out of infancy, the microfinance industry faces major challenges, including its ability to deal with mobile banking and other technology and concerns that some markets are now over-saturated with microfinance. How the industry deals with these and other challenges will determine whether it will continue to grow or will be subsumed within the larger global financial sector. This book is based on the results of a workshop at Lehigh University among thirty-four leaders in the industry. The editors, working with contributions from more than a dozen leading authorities in the field, tell the important story of how microfinance developed, how it has met the needs of hundreds of millions of people, and they address key questions about how it can continue to meet those needs in the future.

This comprehensive guide serves to illuminate the rise and development of FinTech in Sweden, with the Internet as the key underlying driver. The multiple case studies examine topics such as: the adoption of online banking in Sweden; the identification and classification of different FinTech categories; process innovation developments within the traditional banking industry; and the Venture Capital (VC) landscape in Sweden, as shown through interviews with VC representatives, mainly from Sweden but also from the US and Germany, as well as offering insight into the companies that are currently operating in the FinTech arena in Sweden. The authors address questions such as: How will the regulatory landscape shape the future of FinTech companies? What are the factors that will likely drive the adoption of FinTech services in the future? What is the future role of banks in the

context of FinTech and digitalization? What are the policies and government initiatives that aim to support the FinTech ecosystem in Sweden? Complex concepts and ideas are rendered in an easily digestible yet thought-provoking way. The book was initiated by the IIS (the Internet Foundation in Sweden), an independent organization promoting the positive development of the Internet in the country. It is also responsible for the Internet's Swedish top-level domain .se, including the registration of domain names, and the administration and technical maintenance of the national domain name registry. The book illustrates how Sweden acts (or does not act) as a competitive player in the global FinTech arena, and is a vital addition to students and practitioners in the field.

FinTech is a major force shaping the structure of the financial industry in sub-Saharan Africa. New technologies are being developed and implemented in sub-Saharan Africa with the potential to change the competitive landscape in the financial industry. While it raises concerns on the emergence of vulnerabilities, FinTech challenges traditional structures and creates efficiency gains by opening up the financial services value chain. Today, FinTech is emerging as a technological enabler in the region, improving financial inclusion and serving as a catalyst for the emergence of innovations in other sectors, such as agriculture and infrastructure.

FinTech is encouraging various new practices, such as diminishing the use of cash in different countries, increasing rate of mobile payments, and introducing new algorithms for high-frequency trading across national boundaries. It is paving the way for new technologies emerging in the information technology scene that allow financial service firms to automate existing business processes and offer new products, including crowdfunding or peer-to-peer insurance. These new products cater to hybrid client interaction and customer self-services, changing the ecosystem by increasing outsourcing for focused specialization by resizing and leading to new ecosystems and new regulations for encouraging FinTech. However, such new ecosystems are also accompanied by new challenges. Innovative Strategies for Implementing FinTech in Banking provides emerging research exploring the theoretical and practical aspects of technology inclusion in the financial sector and applications within global financing. It provides a clear direction for the effective implementation of FinTech initiatives/programs for improving banking financial processes, financial organizational learning, and performance excellence. Featuring coverage on a broad range of topics such as artificial intelligence, social financing, and customer satisfaction, this book encourages the management of the financial industry to take a proactive attitude toward FinTech, resulting in a better decision-making capability that will support financial organizations in their journey towards becoming FinTech-based organizations. As such, this book is ideally designed for

financial analysts, finance managers, finance administrators, banking professionals, IT consultants, researchers, academics, students, and practitioners

A growing body of evidence suggests that financial literacy plays an important role in financial well-being, and that differences in financial knowledge acquired early in life can explain a significant part of financial and more general well-being in adult life. Financial technology (FinTech) is revolutionizing the financial

services industry at an unrivalled pace. Views differ regarding the impact that FinTech is likely to have on personal financial planning, well-being and societal welfare. In an era of mounting student debt, increased (digital) financial inclusion and threats arising from instances of (online) financial fraud, financial education and enlightened financial advising are appropriate policy interventions that enhance financial and overall well-being.

*Financial Literacy and Responsible Finance in the FinTech Era: Capabilities and Challenges* engages in this important academic and policy agenda by presenting a set of seven chapters emanating from four parallel streams of literature related to financial literacy and responsible finance. The chapters in this book were originally published as a special issue of *The European Journal of Finance*.

Get a handle on disruption, innovation and opportunity in investment technology. The digital evolution is enabling the creation of sophisticated software solutions that make money management more accessible, affordable and eponymous. Full automation is attractive to investors at an early stage of wealth accumulation, but hybrid models are of interest to investors who control larger amounts of wealth, particularly those who have enough wealth to be able to efficiently diversify their holdings. Investors can now outperform their benchmarks more easily using the latest tech tools. The WEALTHTECH Book is the only comprehensive guide of its kind to the disruption, innovation and opportunity in technology in the investment management sector. It is an invaluable source of information for entrepreneurs, innovators, investors, insurers, analysts and consultants working in or interested in investing in this space.

- Explains how the wealth management sector is being affected by competition from low-cost robo-advisors
- Explores technology and start-up company disruption and how to delight customers while managing their assets
- Explains how to achieve better returns using the latest fintech innovation
- Includes inspirational success stories and new business models
- Details overall market dynamics

The WealthTech Book is essential reading for investment and fund managers, asset allocators, family offices, hedge, venture capital and private equity funds and entrepreneurs and start-ups.

Gender-sensitive policy and programming have an integral role to play in fostering inclusive agricultural growth to meet the commitments of African countries to the Malabo Declaration goals. The 2019 Annual Trends and Outlook Report from ReSAKSS applies a gender lens to key issues that must be addressed to fully achieve these goals. Chapters examine the intersections between gender and (1) the context and institutions within which rural people operate; (2) the natural resources that men and women depend on for agriculture, sources of vulnerability, and resilience to shocks; (3) assets and income; and (4) livelihood strategies and well-being. The report serves as the official M&E report for the Comprehensive Africa Agriculture Development Programme (CAADP), tracking progress on over 30 CAADP indicators.

Rapid globalization and digitalization have transformed the financial landscape of ASEAN+3—the Association of Southeast Asian Nations (ASEAN) and the People’s Republic of China, Japan, and the Republic of Korea. Despite impressive reforms, the region faces continued challenges. These include deepening corporate bond markets, coping with cross-border bank concentration risk, reducing dependence on the United States dollar, achieving sustainable infrastructure investments, addressing pension issues, and supporting fintech development. This edited volume highlights the potential for stronger regional financial cooperation to address such challenges. It explores how regional financial

cooperation could promote greater financial resilience and stability amid rapid economic and financial development and technological change.

The buzz word USD 5 Trillion size of Indian economy in the next five years is more than the current size of the economy of Japan & Germany. It is both ambitious and inspiring. Achieving this dream, as a country, particularly in the Post COVID 19 Pandemic season demands a high degree of creativity in addition to the hard and smart works. It requires accelerating the current pace of innovation and development in addition to the up-gradation of the systems and infrastructure so as to provide a better eco-system than now. The intent to achieve this mission definitely requires quite a good number of passionate entrepreneurs venturing their startups in plethora of fields and industries thereby requires the widening of the startup highway. To make this happen, it requires changes, right from policy level to that of grass root. It also requires to lift the spirit of young and old citizens living both in rural and urban areas of the country. This virtual conference, in its endeavour, is attempting to provide space for the think tanks from the industry and the academia to share their creative insights. This would turn the challenges thrown by this global epidemic and inspire the participants to prompt and be instrumental in taking the mission of initiating start-up for achieving the USD 5 Trillion economy of India in the Post COVID 19 world.

The 2008 global financial crisis represented a pivotal moment that separated prior phases of the development of financial technology (FinTech) and regulatory technology (RegTech) from the current paradigm. Today, FinTech has entered a phase of rapid development marked by the proliferation of startups and other new entrants, such as IT and ecommerce firms that have fragmented the financial services market. This new era presents fresh challenges for regulators and highlights why the evolution of FinTech necessitates a parallel development of RegTech. In particular, regulators must develop a robust new framework that promotes innovation and market confidence, aided by the use of regulatory "sandboxes." Certain RegTech developments today are highlighting the path toward another paradigm shift, which will be marked by a reconceptualization of the nature of financial regulation.

Technology is changing the landscape of the financial sector, increasing access to financial services in profound ways. These changes have been in motion for several years, affecting nearly all countries in the world. During the COVID-19 pandemic, technology has created new opportunities for digital financial services to accelerate and enhance financial inclusion, amid social distancing and containment measures. At the same time, the risks emerging prior to COVID-19, as digital financial services developed, are becoming even more relevant.
