Simply download the PDF files and print the maps to take outside on your first stargazing ventures. No telescope or binoculars required.
 Stargazing 101 – A Beginner’s Guide to Stargazing – Cosmic ...
 ...Orion is a constellation beginner stargazers will easily recognize. A good telescope will give you a deeper view of the night sky, close-ups of the moon, and a better view of stars and planets. With a telescope, you will see billions of celestial objects that you’d only faintly see with the naked eye, or may be not at all.
 Beginners Guide To Stargazing – Imaging Earth
 If you know you definitely want to get into stargazing, then it’s worth investing in a proper telescope along with a decent camera and tripod to capture the best moments. But, for beginners, binoculars are cheaper, easier to carry and brilliant for seeing the moon, planets and some deep sky objects.
