This volume offers a state-of-the-art picture of work undertaken in the

field of computer-aided corpus linguistics. While the focus is on English, central insights can be generalised to other languages, as well. As a work intended to mark the Silver Jubilee of ICAME, the International Computer Archive of Modern and Medieval English, the book combines surveys of the discipline by some of its major pioneers, including founders of ICAME itself, with cutting-edge work by younger scholars. It is divided into three sections: "Overviewing

years of corpus linguistic studies", "Descriptive studies in English syntax and semantics", and "Second Language Acquisition, parallel corpora and specialist corpora". The book bears witness to the impressive advances that have characterised the development of corpus linguistics over the past few decades - from terminological issues to practical applications, from theoretical and descriptive research to applied approaches, from monolingual to

multilingual and specialist corpora, from corpus design to corpus exploitation tools.

Finally, Caterina goes on a trip to Lago Maggiore with her Italian family, and we learn phrases needed to stay at a hotel, go sight-seeing, and of course, go to the restaurant and
