#### **Elementary Tagalog** Learning Tagalog

It's true that some people spend years studying Spanish before they finally get around to speaking the language. But here's a better idea. Skip the years of study and jump right to the speaking part. Sound crazy? No, it's language hacking. Unlike most traditional language courses that try to teach you the rules of Spanish, #LanguageHacking shows you how to learn and speak Italian through proven memory techniques, unconventional shortcuts and conversation strategies perfected by one of the

world's greatest language learners, Benny Lewis, aka the Irish Polyglot. Using the language hacks -shortcuts that make learning simple - that Benny mastered while learning his 11 languages and his 'speak from the start' method, you will crack the language code and exponentially increase your language abilities so that you can get fluent faster. It's not magic. It's not a language gene. It's not something only "other people" can do. It's about being smart with how you learn, learning what's indispensable, skipping what's not, and using what you've learned to have real conversations in Spanish from day one. The Method #LanguageHacking takes a modern approach to language learning, blending the power of online social collaboration with traditional methods. It focuses on the conversations that learners need to master right away, rather than presenting language in order of difficulty like most courses. This means that you can have conversations immediately, not after years of study. Each of the 10 units culminates with a speaking 'mission' that prepares you to use the language you've learned to talk about yourself. Through the language hacker online learner community, you can share your personalized speaking 'missions' with other learners - getting and giving feedback and extending your learning beyond the pages of the book . You don't need to go abroad to learn a language any more.

*Tagalog for Beginners* Innovative Language Learning  
Benny Lewis, who speaks over ten languages—all self-taught—runs the largest language-learning blog in the world, *Fluent In 3 Months*. Lewis is a full-time "language hacker," someone who devotes all of his time to finding better, faster, and more efficient ways to learn languages. *Fluent in 3 Months: How Anyone at Any Age Can Learn to Speak Any Language from Anywhere in the World* is a new blueprint for fast language learning. Lewis argues that you don't need a great memory or "the language gene" to learn a language quickly, and debunks a number of long-held beliefs, such as adults not being as good of language learners as children.

**NATIONAL BESTSELLER •** For anyone who wants to learn a foreign  
 language, this is the method that will finally make the words  
 stick. "A brilliant and thoroughly modern guide to learning new  
 languages."—Gary Marcus, cognitive psychologist and author of  
 the New York Times bestseller *Gitars Zero* At thirty years old,  
 Gabriel Wyner speaks six languages fluently. He didn't learn  
 them in school—who does? Rather, he learned them in the past  
 few years, working on his own and practicing on the subway,  
 using simple techniques and free online resources—and here he  
 wants to show others what he's discovered. Starting with  
 pronunciation, you'll learn how to rewire your ears and turn  
 foreign sounds into familiar sounds. You'll retrain your tongue to  
 produce those sounds accurately, using tricks from opera singers  
 and actors. Next, you'll begin to tackle words, and connect  
 sounds and spellings to imagery rather than translations, which  
 will enable you to think in a foreign language. And with the help  
 of sophisticated spaced-repetition techniques, you'll be able to  
 memorize hundreds of words a month in minutes every day. This  
 is brain hacking at its most exciting, taking what we know about  
 neuroscience and linguistics and using it to create the most  
 efficient and enjoyable way to learn a foreign language in the  
 spare minutes of your day.

**My First Book of Tagalog Words** Tuttle Publishing

There are many reasons to be curious about the way people  
 learn, and the past several decades have seen an explosion of  
 research that has important implications for individual learning,  
 schooling, workforce training, and policy. In 2000, *How People*  
*Learn: Brain, Mind, Experience, and School: Expanded Edition* was  
 published and its influence has been wide and deep. The report  
 summarized insights on the nature of learning in school-aged  
 children; described principles for the design of effective learning  
 environments; and provided examples of how that could be  
 implemented in the classroom. Since then, researchers have  
 continued to investigate the nature of learning and have  
 generated new findings related to the neurological processes  
 involved in learning, individual and cultural variability related to  
 learning, and educational technologies. In addition to expanding  
 scientific understanding of the mechanisms of learning and how  
 the brain adapts throughout the lifespan, there have been  
 important discoveries about influences on learning, particularly  
 sociocultural factors and the structure of learning environments.  
*How People Learn II: Learners, Contexts, and Cultures* provides a  
 much-needed update incorporating insights gained from this  
 research over the past decade. The book expands on the  
 foundation laid out in the 2000 report and takes an in-depth look  
 at the constellation of influences that affect individual learning.  
*How People Learn II* will become an indispensable resource to  
 understand learning throughout the lifespan for educators of  
 students and adults.
