*McGraw-Hill Education Math Grade 7, Second Edition* Carson-Dellosa Publishing  
Glencoe Science: Human Body Systems, a module in the Glencoe Science 15 book series, provides students with accurate and comprehensive coverage of middle school National Science Education Standards. Concepts are explained in a clear, concise manner, and are integrated with a wide range of hands-on experiences, critical thinking

opportunities, real-world applications, and connections to other sciences and to non-science areas of the curriculum. Co-authored by National Geographic, unparalleled graphics reinforce key concepts. A broad array of print and technology resources help differentiate and accommodate all learners. The modular approach allows you to mix and match books to meet your specific curriculum needs.

*Life Science* McGraw-Hill Education  
This comprehensive introduction to educational research covers the most widely used research methodologies and

discusses the research process in detail. Step-by-step analysis of real research studies provides students with practical examples of how to prepare their work and read that of others. End-of-chapter problem sheets, comprehensive coverage of data analysis, and discussion of the preparation of research proposals and reports make the text appropriate for courses that focus on doing research as well as for courses that stress reading and understanding research.

Calculus for Business, Economics, and  
the Social and Life Sciences introduces  
calculus in real-world contexts and  
provides a sound, intuitive  
understanding of the basic concepts  
students need as they pursue careers in  
business, the life sciences, and the social  
sciences. The new Ninth Edition builds  
on the straightforward writing style,  
practical applications from a variety of  
disciplines, clear step-by-step problem  
solving techniques, and comprehensive  
exercise sets that have been hallmarks  
of Hoffmann/Bradley's success through  
the years.

Students will learn the science of life in  
this colorful textbook that displays an  
engaging design sure to grab their  
attention from the very first day. Each  
chapter of Life Science includes well-  
researched material written at grade  
level, colorful images to reinforce text  
content, boxes with fun facts and helpful  
explanations, a list of key terms, a  
chapter summary, thought-provoking  
review questions, and extra questions to  
prepare students for standardized tests.  
Students will study cell biology, genetics,  
the history of life, microbiology, botany,  
zoology, ecology, and human anatomy  
and physiology, all within a biblical  
framework. -

Biology for AP® courses covers the scope and sequence requirements of a typical two-semester Advanced Placement® biology course. The text provides comprehensive coverage of foundational research and core biology concepts through an evolutionary lens. Biology for AP® Courses was designed to meet and exceed the requirements of the College Board's AP® Biology framework while allowing significant flexibility for instructors. Each section of the book includes an introduction based on the AP® curriculum and includes rich features that engage students in scientific practice and AP® test preparation; it also highlights careers and research opportunities in biological sciences.

**Concepts of Biology** Macmillan

Building Skills: Math provides additional mathematics skills practice related to the science content in each chapter. It includes five basic categories of math skill review: Number Sense; Algebra and Functions; Measurement and Geometry; Statistics, Data Analysis and Probability; and Mathematical Reasoning.

*Science* W. W. Norton

The Study Guide Workbook allows for differentiated instruction through a wide range of question formats. Worksheets and study tools for each section of the text help track students' progress toward understanding concepts; Guided Reading Activities help students identify and comprehend the important information in each chapter.

*Integrated Science* McGraw-Hill Education

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and

includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.
