Studies in Global L
Aquatic Dicotyledons of North America:
Ecology, Life History, and Systematics
brings together a wealth of information
on the natural history, ecology, and
systematics of North American aquatic
plants. Most books on aquatic plants
have a taxonomic focus and are
intended primarily for identification.
Instead, this book provides a
comprehensive overview of the biology
of major aquatic species by compiling
information from numerous sources that
lie scattered among the primary
literature, herbarium databases, and
other reference materials. Included
dicotyledon species are those having an
obligate (OBL) wetland status, a
designation used in the USACE National
Wetland Plant List. Recent phylogenetic
analyses are incorporated and rationale
is provided for interpreting this
information with respect to species
relationships. This diverse assemblage of
information will be useful to a wide

range of interests including academic
researchers, wildlife managers, students,
and virtually anyone interested in the
natural history of aquatic and wetland
plants. Although focusing specifically on
North America, the cosmopolitan
distribution of many aquatic plants
should make this an attractive text to
people working virtually anywhere
outside of the region as well. This book is
an essential resource for assisting with
wetland delineation.

In this classic work, Owen Chadwick traces the development of the notion that changes in Christian doctrine are both possible and legitimate. In the seventeenth century Bossuet opined that Christian doctrine hardly or never changed. Over two centuries later Newman saw that its expression necessarily changed in a changing society. This book shows how one opinion changed into the other.

For hundreds of years, psychology has looked into the dysfunctions and symptoms of the mind. It's only over the last few decades that the field has started to pay attention to what constitutes a functional and content life. Instead of using disease to understand

health, positive psychology studies the components of a good life and helps people not only avoid mental health problems but develop happiness. The work done in positive psychology is now at a point where applications are being developed in positive psychotherapy and extended to those with psychiatric diagnoses in positive psychiatry. While these fields are a recent development they hold the promise of helping all of us live a fulfilled life. Medicine in general, and psychiatry in particular, suffers from a worldview that is symptom- and deficit-oriented. By adopting a positive approach, psychology, psychotherapy, and psychiatry add a more holistic, integrative, resource oriented, and preventive perspective. There is great urgency in developing resources and potentials in our patients, not only freeing them from their disorders. Psychiatrists and psychotherapists alike are incorporating these positive tools into their practices with positive clinical outcomes. Standing on the shoulders of pioneers like Nossrat Peseschkian, in positive psychotherapy, and Dilip Jeste, in positive psychiatry, this textbook is the first to bring together these innovations in one volume that will serve as an excellent resource for medical professionals looking to reap the benefits gained by the studies in these areas. Currently, the majority of texts that are available are targeting psychologists and researchers, whereas this book seeks to use positive psychology as the foundation on which the clinical applications are built. As such, this book will be of interest to psychiatrists, psychologists, social workers, and other mental health professionals. It may be used in educating a new generation of mental health professionals in these tenets that

are expanding the reach of psychology, the practice of psychotherapy, and the scope of psychiatry.

The content is divided into five parts: (1) A Professional Framework for Correctional Counseling; (2) Understanding the Special Challenges Faced by the Correctional Counselor in the Prison Setting; (3) Offender Assessment, Diagnosis, and Classification; (4) Contemporary Approaches to Correctional Counseling

and Treatment, (5) Interventions for Special Populations, and (6) Putting It All Together. The book is appropriate for upper-level undergraduates and graduate students in Criminal Justice and Criminology, Psychology, and Social Work programs as well as correctional counseling practitioners.

"Norms beyond Empire seeks to rethink the relationship between law and empire by emphasizing the role of local normative production. While European imperialism is often viewed as being able to shape colonial law and government to its image, this volume argues that early modern empires could never monolithically control how these processes unfolded. Examining the Iberian empires in Asia, it seeks to look at norms as a means of escaping the often too narrow concept of law and look beyond empire to highlight the ways in which law-making and local normativities frequently acted beyond colonial rule. The ten chapters explore normative production from this perspective by focusing on case studies from China, India, Japan, and the Philippines. Contributors are: Manuel Bastias Saavedra, Marya Svetlana T. Camacho, Luisa Stella de Oliveira Coutinho Silva, Rômulo da Silva Ehalt, Patricia Souza de Faria, Fupeng Li, Miguel Rodrigues Lourenço, Abisai Perez Zamarripa, Marina Torres Trimállez, and Ângela Barreto Xavier"--

The aim of the American Psychiatric Association Practice Guideline series is to improve patient care. Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other medical and mental health professionals, and the general public about appropriate and inappropriate

treatments. The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.
