An Introduction to Greek Epigraphy Forgotten Books

Epigraphic Evidence is an accessible guide to the responsible use of Greek and Latin inscriptions as sources for ancient history. It introduces the types of historical information supplied by inscriptional texts and the methods with which they can be used. It outlines the limitations as well as the advantages of the different types of evidence covered. Epigraphic Evidence includes a general introduction, a guide to the arrangement of the standard corpora inscriptions and individual chapters on local languages and native cultures, epitaphs and the ancient economy amongst others. Illustrated Introduction to Latin Epigraphy Univ of California Press

This book provides a general introduction to the grammar and syntax of Hellenistic, or New Testament, Greek. With twenty-four chapters, it is suitable for two-semester courses. Each lesson is structured around equipping students to read passages drawn directly from the Greek New Testament. In addition to the traditional Erasmian system, students are offered the option of using a historical Greek system of pronunciation similar to that used in early Christian preaching and prayer. The book includes extensive reference tools, including paradigms for memorization, grammatical appendices and illustrations. The text is accompanied by a website that offers a workbook of passages for translation. Each chapter of the grammar concludes with a vocabulary list of Greek terms that appear in that lesson's assigned passage for translation, found in the online workbook. Audio recordings of all vocabulary words and translation passages, using the historical Greek system of pronunciation, are provided online.

"In short, this is a reference work of the best kind. For the beginner, it is indispensable. And for those who already know something about its subject matter, the book is in many ways useful, informative, and interesting. We all owe a debt to [the author] for undertaking this significant project, and for completing it so well." —Michael Peachin, *Classical World* ". . . provides invaluable road maps for non-epigraphers faced with passages of inscribed Greek." —Graham Shipley, *Bryn Mawr Classical Review* Greek inscriptions form a valuable resource for the study of all aspects of the Greco-Roman world. They are primary witnesses to society's laws and institutions, religious habits, and language. This volume provides students with the tools to take advantage of the historical value of these treasures. It examines letter forms, ancient names, and ancient calendars, knowledge of which is essential in reading inscriptions of all kinds. B. H. McLean discusses the classification of

inscriptions into their various categories and analyzes particular types of inscriptions, including decrees, honorary inscriptions, dedications, funerary inscriptions, and manumissions. Finally, McLean includes special topics that bear upon the interpretation of specific features of inscriptions, such as Greek and Roman administrative titles and functions.

An Introduction to Greek Epigraphy Legare Street Press

This book advances our understanding of the place of Latin inscriptions in the Roman world. It enables readers, especially those new to the subject, to appreciate both the potential and the limitations of inscriptions as historical source material, by considering the diversity of epigraphic culture in the Roman world and how it has been transmitted to the twenty-first century. The first chapter offers an epigraphic sample drawn from the Bay of Naples, illustrating the dynamic epigraphic culture of that region. The second explores in detail the nature of epigraphic culture in the Roman world, probing the limitations of traditional ways of dividing up inscriptions into different categories, and offering examples of how epigraphic culture developed in different geographical, social and religious contexts. It examines the 'life-cycle' of inscriptions - how they were produced, viewed, reused and destroyed. Finally, the third provides guidance on deciphering inscriptions face-to-face and handling specialist epigraphic publications.

Excerpt from *An Introduction to Greek Epigraphy, Vol. 1* Every effort has been made to keep an courant with the periodical literature, but some of the more recent epigraphical information could find a place only in the Addenda and Addenda nova. While the last sheets are being printed off, I read in the latest number of the Wiener Studien (1887, p. 223 sqq.) A. Bauer's opinion that neither the Delphian tripod with intertwined serpents (no. 259) nor the memorial at Olympia (see p. 260) was intended to com memorate especially the battle of Plataeae. He contends that Pausanias (v. 23. 1, x. 13. 9) was the first to refer it to Plataeae: the other writers quoted by Roehl (iga 70) represent both as memorials erected by the Greeks generally who fought against the Persians, and especially by those whose names appear on them, and who must have been contributors to the expense of erecting them. An Introduction to Greek Epigraphy... by E. S. Roberts,... Routledge

Excerpt from *An Introduction to Greek Epigraphy, Vol. 2: The Inscriptions of Attica* In the Commentary following each text the editors have endeavoured where it was possible to treat the particular text as typical and as illustrative of others of the same class. In many instances, with the view of avoiding repetition in the notes, a prefatory 'remark' introduces a special category of inscriptions, such as no. Vi (p. 127) on the formulae of decrees after b.c., or no. Viii (p. 145) on the Ephebic inscriptions. It happens not unfrequently that an inscription may be classed under more than one head. Thus a document which may be technically a decree or a pendant to a decree falls more naturally under another head, such as that of finance 3 the so-called 'hecatompedon' inscription (no. 132) is a case in point. This is a much-needed textbook for students of epigraphy and an up-to-date reference work for scholars. Central to the work are its photos. Professor Gordon presents 100 Latin inscriptions arranged in chronological order and illustrated by the best available photographs. The inscriptions, which range in date from the sixth century B.C. to A.D. 525, are collated with standard texts and are accompanied by translations and full annotation. They are preceded by an original introduction dealing with important aspects of Latin epigraphy and followed by several appendices on such special topics as Roman numerals. The photographs of these inscriptions reveal the close relationship between Latin inscriptions and our present-day type fonts by way of the humanistic hand of fifteenth-century European scholars. This book will be of interest not only to students and scholars of epigraphy but to those interested in the history of typography as well.

An Introduction to Greek Epigraphy of the Hellenistic and Roman Periods from Alexander the Great Down to the Reign of Constantine (323 B.C.-A.D. 337) CUP Archive

In 1887, when the first volume of this work was published, Greek epigraphy was not systematically studied or taught in English universities, and the book was specifically written to fulfil a need for 'a

popular work, giving a classification of Greek inscriptions according to their age, country and subject, and a selection of texts by way of samples, under each class'. At a time when the value of some Greek letters (those peculiar to one city's version of the alphabet and so known rarely in surviving inscriptions) was not universally agreed, and when excavation was regularly providing new materials for study, the book was widely welcomed as a tool for research. The first volume contains a historical sketch of the Greek alphabet and a sequence of inscriptions showing its development across the Mediterranean area and Asia Minor until the end of the fifth century CE.
