 This revised and updated second edition of *The Globalization and Development Reader* builds on the considerable success of a first edition that has been used around the world. It combines selected readings and editorial material to provide a coherent text with global coverage, reflecting new theoretical and empirical developments. Main text and core reference for students and professionals studying the processes of social change and development in "third world" countries. Carefully excerpted materials facilitate the understanding of classic and contemporary writings. Second edition includes 33 essential readings, including 21 new selections. New pieces cover the impact of the recession in the global North, global inequality and uneven development, gender, international migration, the role of cities, agriculture and on the governance of pharmaceuticals and climate change politics. Increased coverage of China and India help to provide genuinely global coverage, and for a student readership the materials have been subject to a higher degree of editing in the new edition. Includes a general introduction to the field, and short, insightful section introductions to each reading. New readings include selections by Alexander Gershenkron, Alice Amsden, Amartya Sen, Anne-Marie Slaughter, Cecile Jackson, Dani Rodrik, David Harvey, Greta Krippner, Kathryn Sikkink, Leslie Sklair, Margaret E. Keck, Michael Burawoy, Nitsan Chorev, Oscar Lewis, Patrick Bond, Peter Evans, Philip McMichael, Pranab Bardhan, Ruth Pearson, Sarah Babb, Saskia Sassen, and Steve Radelet.  
*Europe in the Aftermath of World War II* Bloomsbury Publishing  
 Contributors to this volume address such topics as how Europeans now see themselves in relation to national identity, whether they identify themselves as citizens of a particular country or as members of a larger socio-political entity, how both natives and immigrants experience national and transnational identity at the local level, and the impact of globalization on national culture and the idea of the nation-state.  
*Europe, America, and Politics Without God* Oxford University Press  
 The perfect starting point for any student new to this fascinating subject, offering a serious yet accessible introduction to anthropology. Across a series of fourteen chapters, *Introducing Anthropology* addresses the different fields and approaches within anthropology, covers an extensive range of themes and emphasizes the active role and promise of anthropology in the world today. The new edition foregrounds in particular the need for anthropology in understanding and addressing today's environmental crisis, as well as the exciting developments of

digital anthropology. This book has been designed by two authors with a passion for teaching and a commitment to communicating the excitement of anthropology to newcomers. Each chapter includes clear explanations of classic and contemporary anthropological research and connects anthropological theories to real-life issues at the local and global levels. The vibrancy and importance of anthropology is a core focus of the book, with numerous interviews with key anthropologists about their work and the discipline as a whole, and plenty of ethnographic studies to consider and use as inspiration for readers' own personal investigations. A clear glossary, a range of activities and discussion points, and carefully selected further reading and suggested ethnographic films further support and extend students' learning. *Introducing Anthropology* aims to inspire and enthuse a new generation of anthropologists. It is suitable for a range of different readers, from students studying the subject at school-level to university students looking for a clear and engaging entry point into anthropology.

*The Dawn of Everything* Hachette UK

The intention of this work is to show that European expansion not only transformed the historical trajectory of non-European societies but also reconstituted the historical accounts of these societies before European intervention. It asserts that anthropology must pay more attention to history.

*The Logics and Politics of Post-WWII Migration to Western Europe* OUP Oxford

The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis. In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.

*The Globalization and Development Reader* Pluto Press (UK)

The influx of African migrants into Europe in recent years has

raised important issues about changing labor economies, new technologies of border control, and the effects of armed conflict. But attention to such broad questions often obscures a fundamental fact of migration: its effects on ordinary life. *Affective Circuits* brings together essays by an international group of well-known anthropologists to place the migrant family front and center. Moving between Africa and Europe, the book explores the many ways migrants sustain and rework family ties and intimate relationships at home and abroad. It demonstrates how their quotidian efforts—on such a mass scale—contribute to a broader process of social regeneration. The contributors point to the intersecting streams of goods, people, ideas, and money as they circulate between African migrants and their kin who remain back home. They also show the complex ways that emotions become entangled in these exchanges. Examining how these circuits operate in domains of social life ranging from child fosterage to binational marriages, from coming-of-age to healing and religious rituals, the book also registers the tremendous impact of state officials, laws, and policies on migrant experience. Together these essays paint an especially vivid portrait of new forms of kinship at a time of both intense mobility and ever-tightening borders.

*Provincializing Europe* Penguin UK

Designed for students without a strong background in history, *Making Europe* is organized around a political chronology to help inexperienced students get a sense of the story of western civilization. Themes of religion, social history, biography and personality, and individual and collective identity enable students to grasp the "big picture." The text's attention to Eastern Europe and thorough coverage of religious history extends right up to the present. The authors' collective experience teaching Western Civilization is evident in the text's carefully designed system of pedagogy that promotes understanding of events and figures of the western past. Focus and review questions, chronologies, key terms and definitions, and chapter summaries help students engage with the material step-by-step, chapter-by-chapter.

#### **African Europeans** Routledge

On Extremism and Democracy in Europe is a collection of short and accessible essays on the far right, populism, Euroscepticism, and liberal democracy by one of the leading academic and public voices today. It includes both sober, fact-based analysis of the often sensationalized "rise of the far right" in Europe as well as passionate defence of the fundamental values of liberal democracy. Sometimes counter-intuitive and always thought-provoking, Mudde argues that the true challenge to liberal democracy comes from the political elites at the centre of the political systems rather than from the political challengers at the political margins. Pushing to go beyond the simplistic opposition of extremism and democracy, which is much clearer in theory than in practice, he accentuates the internal dangers of liberal democracy without ignoring the external threats. This book is essential reading for anyone interested in European politics, extremism and/or current affairs more generally.

#### *African Migrations to Europe and the Pursuit of Social Regeneration* Chartwell Books

Why do Europeans and Americans see the world so differently? Why do Europeans and Americans have such different understandings of democracy and its discontents in the twenty-first century? Contrasting the civilization that produced the starkly modernist "cube" of the Great Arch of La Defense in Paris with the civilization that produced the "cathedral" of Notre-Dame, George Weigel argues that Europe's embrace of a narrow secularism has led to a crisis of morale that is eroding Europe's soul and threatening its future -- with dire lessons for the rest of the democratic world. Weigel traces the origins of "Europe's problem" to the atheistic humanism of the nineteenth-century European intellectual life, which set in motion a historical process that produced two world wars, three totalitarian systems, the Gulag, Auschwitz, the Cold War -- and, most ominously, the Continent's de-population, which is worse today than during the Black Death. And yet, many Europeans still insist -- most recently, during the debate over a new EU constitution -- that only a public square shorn of religiously-informed moral argument is safe for human rights and democracy. Precisely the opposite, Weigel suggests, is true: the people of the "cathedral" can give a compelling account of their commitment to everyone's freedom; the people of the "cube" cannot. Can there be any true "politics" -- any true deliberation about the common good, and any robust defense of freedom -- without God? George Weigel makes a powerful case that the answer is "No," because, in the final analysis, societies are only as great as their spiritual aspirations.

#### **Cultural History in Europe** Verso Books

A dazzling history of Africans in Europe, revealing their unacknowledged role in shaping the continent One of the Best History Books of 2021 — Smithsonian Conventional wisdom holds that Africans are only a recent presence in Europe. But in *African Europeans*, renowned historian Olivette Otele debunks this and uncovers a long history of Europeans of African descent. From the third century, when the Egyptian Saint Maurice became the leader of a Roman legion, all the way up to the present, Otele explores encounters between those defined as "Africans" and those called "Europeans." She gives equal attention to the most prominent figures—like Alessandro de Medici, the first duke of Florence thought to have been born to a free African woman in a Roman village—and the untold stories—like the lives of dual-heritage families in Europe's coastal trading towns. *African Europeans* is a landmark celebration of this integral, vibrantly complex slice of European history, and will redefine the field for

years to come.

What is the current state of discussion in Cultural History? Which European institutions engage exclusively in Cultural History and which topics do they address? And how will Cultural History develop in the future? These and other questions are raised by European scholars in the discussion of Institutions, Themes and Perspectives of Cultural History in this volume. It provides a profound overview of contemporary developments in Scandinavia, Finland, Great Britain, Latvia, Poland, Hungary, Austria, Switzerland, Germany, Italy and Spain.

#### **Voluntary Health Insurance in Europe** Cambridge University Press

At the end of the twentieth century, many believed the story of European political development had come to an end. Modern democracy began in Europe, but for hundreds of years it competed with various forms of dictatorship. Now, though, the entire continent was in the democratic camp for the first time in history. But within a decade, this story had already begun to unravel. Some of the continent's newer democracies slid back towards dictatorship, while citizens in many of its older democracies began questioning democracy's functioning and even its legitimacy. And of course it is not merely in Europe where democracy is under siege. Across the globe the immense optimism accompanying the post-Cold War democratic wave has been replaced by pessimism. Many new democracies in Latin America, Africa, and Asia began "backsliding," while the Arab Spring quickly turned into the Arab winter. The victory of Donald Trump led many to wonder if it represented a threat to the future of liberal democracy in the United States. Indeed, it is increasingly common today for leaders, intellectuals, commentators and others to claim that rather than democracy, some form of dictatorship or illiberal democracy is the wave of the future. In *Democracy and Dictatorship in Europe*, Sheri Berman traces the long history of democracy in its cradle, Europe. She explains that in fact, just about every democratic wave in Europe initially failed, either collapsing in upon itself or succumbing to the forces of reaction. Yet even when democratic waves failed, there were always some achievements that lasted. Even the most virulently reactionary regimes could not suppress every element of democratic progress. Panoramic in scope, Berman takes readers through two centuries of turmoil: revolution, fascism, civil war, and -- finally -- the emergence of liberal democratic Europe in the postwar era. A magisterial retelling of modern European political history, *Democracy and Dictatorship in Europe* not only explains how democracy actually develops, but how we should interpret the current wave of illiberalism sweeping Europe and the rest of the world.

#### **The Strange Death of Europe** Berg Publishers

From the monarchical terror of the Middle Ages to the mangled Europe of the twenty-first century, *A People's History of Modern Europe* tells the history of the continent through the deeds of those whom mainstream history tries to forget. Europe provided the perfect conditions for a great number of political revolutions from below. The German peasant wars of Thomas Müntzer, the bourgeois revolutions of the eighteenth century, the rise of the industrial worker in England, the turbulent journey of the Russian Soviets, the role of the European working class throughout the Cold War, student protests in 1968 and through to the present day, when we continue to fight to forge an alternative to the barbaric economic system. By focusing on the role of women, trade unions and students, this history sweeps away the tired platitudes of the privileged upon which our current understanding is based, providing an opportunity to see our history differently.

#### *Introducing Anthropology* Routledge

*Victims of Progress*, now in its sixth edition, offers a compelling account of how technology and development affect indigenous peoples throughout the world. Bodley's expansive look at the struggle between small-scale indigenous societies, and the colonists and corporate developers who have infringed their territories reaches from 1800 into today. He examines major

issues of intervention such as social engineering, economic development, self-determination, health and disease, global warming, and ecocide. Small-scale societies, Bodley convincingly demonstrates, have survived by organizing politically to defend their basic human rights. Providing a provocative context in which to think about civilization and its costs—shedding light on how we are all victims of progress—the sixth edition features expanded discussion of "uprising politics," Tebtebba (a particularly active indigenous organization), and voluntary isolation. A wholly new chapter devotes full coverage to the costs of global warming to indigenous peoples in the Pacific and the Arctic. Finally, new appendixes guide readers to recent protest petitions as well as online resources and videos.

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, *Orientalism* remains one of the most important books written about our divided world.

#### **The Iwakura Mission to America and Europe** John Wiley & Sons

This eagerly awaited volume, from a leading scholar on Europeanization, explores the impact of European integration on national democracies. Focusing on the case studies of France, Britain, Italy, and Germany, this is an exciting contribution to work on the implications of European integration for democratic government.

No two markets for voluntary health insurance (VHI) are identical. All differ in some way because they are heavily shaped by the nature and performance of publicly financed health systems and by the contexts in which they have evolved. This volume contains short, structured profiles of markets for VHI in 34 countries in Europe. These are drawn from European Union member states plus Armenia, Iceland, Georgia, Norway, the Russian Federation, Switzerland and Ukraine. The book is aimed at policy-makers and researchers interested in knowing more about how VHI works in practice in a wide range of contexts. Each profile, written by one or more local experts, identifies gaps in publicly-financed health coverage, describes the role VHI plays, outlines the way in which the market for VHI operates, summarizes public policy towards VHI, including major developments over time, and highlights national debates and challenges. The book is part of a study on VHI in Europe prepared jointly by the European Observatory on Health Systems and Policies and the WHO Regional Office for Europe. A companion volume provides an analytical overview of VHI markets across the 34 countries.
